

Alveo™ U55C Accelerator Card

OVERVIEW

Next-generation HPC applications need to do more with each watt: squeeze more out of each clock cycle, scale out more efficiently, and do the same amount of work while moving data less.

Built from the ground up to deliver the best performance-per-watt for HPC and Big Data workloads, the Alveo™ U55C accelerator card delivers the efficiency and scalability called for by the most demanding applications. The U55C delivers dense compute and HBM, with onboard 200Gbps networking enabling massive scale-out using Xilinx's groundbreaking open-standards based clustering.

ALVEO ADVANTAGES

Built around Xilinx's powerful [Virtex™ XCU55 UltraScale+ FPGA](#), the Alveo U55C card delivers blazing fast application acceleration. The U55C harnesses the power of Xilinx Adaptive Computing to deliver extraordinary performance unmatched by competing architectures, with:

Data pipeline
hyperparallelism

Superior memory
management

Optimized data
movement
